COMMUNITY REINVESTMENT ACT PERFORMANCE EVALUATION

The First National Bank in Tremont
Charter Number 13579
134 South Sampson Street
Tremont, Illinois 61568

Office of the Comptroller of the Currency
Peoria Office
211 Fulton Street, Suite 604
Peoria, Illinois 61602

NOTE: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, and should not be construed as, an assessment of the financial condition of this institution. The rating assigned to this institution does not represent an analysis, conclusion, or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

Overall CRA Rating

Institution's CRA Rating: This institution is rated **Satisfactory**.

The Lending Test is rated: Satisfactory.

The major factors that support this rating include:

- The Lending Test rating is based on the satisfactory performance in the State of Illinois.
- The borrower distribution of loans reflects reasonable penetration within the assessment areas (AAs).
- The bank originates a majority of its loans to customers within its AAs.
- The loan-to-deposit (LTD) ratio is reasonable.

Loan-to-Deposit Ratio

Considering the bank's size, financial condition, and credit needs of the AAs, the bank's LTD ratio is reasonable.

The quarterly average LTD ratio was 69.8 percent for the sixteen-quarter period from January 1, 2018, to December 31, 2021, with a low LTD ratio of 62.5 percent and a high LTD ratio of 74.6 percent.

The First National Bank in Tremont (FNBT or bank) ranked second of five similarly situated FDIC insured financial institutions that compete with the bank for deposits in the AAs. The comparable institutions ranged in asset size from \$60 million to \$110 million and reported quarterly average LTD ratios from 36.2 percent to 88.8 percent. FNBT's quarterly average LTD ratio is up since the last CRA evaluation at 56 percent.

Lending in Assessment Area

A majority of the bank's loans are inside its AAs.

The bank originated and purchased 78 percent of its total loans inside the bank's AAs during the evaluation period. This analysis is performed at the bank, rather than the AA, level. This percentage does not include extensions of credit by affiliates that may be considered under the other performance criteria.

Lending Inside and Outside of the Assessment Area										
Loan Category	Number of Loans				Total #	Dollar Amount of Loans \$(000s)				Total \$(000s)

Description of Institution

FNBT is a \$160 million intrastate institution headquartered in Tremont, Illinois, located in central Illinois with two additional branch locations. FNBT did not open or close any locations since the previous CRA evaluation. However, they did move their New Holland, Illinois, branch across the street in 2021. This did not impact the bank's AA in any way.

There was no change in FNBT's corporate structure since the previous CRA evaluation. The bank is wholly owned by Tremont Bancorp, Inc. (TBI), a holding company headquartered in Tremont, Illinois. TBI does not negatively affect the bank's ability to meet the credit needs of the community.

The CRA evaluation has two rating areas. The Tazewell metropolitan statistical area (MSA) AA (Tazewell AA) is composed of select census tracts (CTs) of Tazewell County, which is part of the Peoria, Illinois MSA. The Logan NonMSA AA (Logan AA) is composed of certain CTs in Logan County, which is a nonmetropolitan area. Refer to appendix A, Scope of the Examination, for a list of geographies comprising each AA.

The Tazewell AA includes two branches with drive-thru services, two ATMs, and banking services available on Saturdays. The Logan AA includes one branch with one ATM and banking services available on Saturdays. Drive-thru services became available at the Logan AA location in 2021. All customers also have banking access through online and mobile platforms.

The bank sources a majority of its deposits, 78 percent, from the Tazewell AA, as of June 30, 2021.

The bank's lending strategy is to provide a range of banking services and products while focusing on customer service, community support, and local decisions. FNBT offers a wide range of products to meet the needs of its customers, including residential real estate, commercial, agriculture, and consumer products. Please see the Public File for more information. There are no legal, financial, or other factors impeding the bank's ability to help meet the credit needs in the bank's AAs. The bank's previous Small Bank CRA rating was "Satisfactory" as detailed in the February 26, 2018, Performance Evaluation.

FNBT held 60 percent of net loans and leases to total assets and had a Tier One Leverage Capital ratio of ten percent at December 31, 2021. Home loans represented the largest loan portfolio at \$34 million, followed by commercial lending at \$28 million, agricultural lending at \$22 million, and consumer lending at \$3 million, at December 31, 2021.

Competition for loans is high due to competition within the AAs, particularly within the Peoria MSA. FNBT competes with national banks, state banks, farm credit unions, and non-bank lenders.

Scope of the Evaluation

Evaluation Period/Products Evaluated

We evaluated FNBT under the Small Bank evaluation procedures, which includes a Lending Test. The Lending Test evaluates the bank's record of meeting the credit needs of its AAs through its lending activities. The evaluation period is from the previous CRA evaluation date of February 26, 2018, through July 6, 2022. The Lending Test evaluated loans originated or purchased from January 1, 2019, through December 31, 2021.

FNBT's primary loan products are home loans and business loans based on the number and dollar amount of loans originated and purchased between January 1, 2019, and December 31, 2021, per bank data. These products accounted for 81 percent, by dollar, and 70 percent, by number, of originations and purchases. We used these lending products for the analysis of this evaluation.

The bank is not required to maintain CRA Loan Application Register data on home and business lending outside of the individual credit files. Therefore, we utilized random sampling to obtain data for the home loans and business loans. We obtained the annual income of the borrowers, gross revenues of the businesses, and geocoded each loan sampled. Performance conclusions for lending between January 1, 2019, and December 31, 2021, are based on the 2015 American Community Survey data.

Selection of Areas for Full-Scope Review

In each state where the bank has an office, one or more of AAs within that state was selected for a full-scope review. For purposes of this evaluation, bank delineated assessment areas located within the same metropolitan statistical area, multistate metropolitan statistical area (MMSA), or combined statistical area (CSA) are combined and evaluated as a single AA. Similarly, bank delineated non-MSA AAs within the same state are combined and evaluated as a single area. These combined AAs may be evaluated as full- or limited-scope. Refer to the "Scope" section under each State Rating for details regarding how full-scope AAs were selected. Refer to appendix A, Scope of Examination, for a list of full- and limited-scope AAs.

Ratings

The bank's overall rating is a blend of the state ratings, and where applicable, multistate ratings.

The Tazewell rating area received a greater weighting as a majority of the bank's branches and deposit activity is within the Tazewell AA.

The MMSA rating and state ratings are based on performance in all bank AAs. Refer to the "Scope" section under each state and MMSA Rating section for details regarding how the areas were weighted in arriving at the respective ratings.

Discriminatory or Other Illegal Credit Practices Review

Pursuant to 12 CFR 25.28(c) or 195.28(c), respectively, in determining a national bank's or federal savings association's (collectively, bank) CRA rating, the OCC considers evidence of discriminatory or other illegal credit practices in any geography by the bank, or in any AA by an affiliate whose loans have been considered as part of the bank's lending performance. As part of this evaluation process, the OCC consults with other federal agencies with responsibility for compliance with the relevant laws and regulations, including the U.S. Department of Justice, the U.S. Department of Housing and Urban Development, and the Bureau of Consumer Financial Protection, as applicable.

The OCC has not identified that this institution (or any affiliate whose loans have been considered as part of the institution's lending performance) has engaged in discriminatory or other illegal credit practices that require consideration in this evaluation.

The OCC will consider any information that this institution engaged in discriminatory or other illegal credit practices, identified by or provided to the OCC before the end of the institution's next performance evaluation in that subsequent evaluation, even if the information concerns activities that occurred during the evaluation period addressed in this performance evaluation.

State Rating

State of Illinois

CRA rating for the State of Illinois¹: Satisfactory

The Lending Test is rated: Satisfactory

The major factors that support this rating include:

- The borrower distribution of loans reflects satisfactory performance.
- A majority of loans are to customers within the AAs.
- The LTD ratio is reasonable.

Description of Institution's Operations in Illinois

FNBT's lending strategy is to provide a range of banking services and products while focusing on customer service, community support, and local decisions. FNBT serves its customers with three locations and three ATMs. Each branch location provides drive-thru services, ATM access, and banking services on Saturdays. FNBT primarily serves the rural areas of southeast Tazewell County and the eastern portion of Logan County. Refer to appendix A, Scope of Examination, for a list of geographies comprising the AAs as well as full- and limited-scope AAs.

Major employment sectors include manufacturing, health care services, agriculture, and retail services.

The annual unemployment rate in the State of Illinois was declining in 2019; however, the rate increased in 2020 due to the Covid-19 pandemic before declining again in 2021, although it remained elevated. The annualized unemployment rates were 4.0 percent in 2019, 9.2 percent in 2020, and 6.1 percent in 2021. While unemployment rates in the AAs were higher due to the Covid-19 pandemic, all counties in the AA had unemployment rates lower than the State of Illinois in 2020 and 2021.

Competition for loans and deposits is high among financial institutions in the AAs due to the number and variety of financial institutions within and accessible to the AA. FNBT competes with national banks, state banks, farm credit institutions, and nonbank financial institutions.

FNBT held the sixth highest deposit market share position in the Tazewell AA at 2.7 percent among 16 FDIC insured financial institutions at June 30, 2021. The top three institutions held a deposit market share of 77.3 percent.

FNBT held the tenth highest deposit market share position in the Logan AA at 3.9 percent among 12 FDIC insured financial institutions at June 30, 2021. The top three institutions held a deposit market share of 56.0 percent.

¹ This rating reflects performance within the state. The statewide evaluations do not reflect performance in the parts of those states contained within a MMSA.

FNBT sourced a substantial majority, 78 percent, of their deposits from the Tazewell AA. Deposits from Logan County account for 22 percent of total deposits.

High rates of poverty in the Logan AA may limit opportunities for lending, particularly to low-income households. The lower level of families living below the poverty level in the Tazewell AA may improve the opportunities for lending.

A community contact from the Tazewell AA stated loans to small businesses are among the greatest credit needs of the community. A community contact from the Logan AA noted loans and microloans to small and start-up businesses is the greatest credit need of the community in addition to affordable housing and financial literacy programs.

Scope of Evaluation in Illinois

FNBT's two AAs both received a full scope review. The Tazewell rating area received a greater weighting as a majority of the bank's branches and deposit activity is within the Tazewell AA.

LENDING TEST

The bank's performance under the Lending Test in Illinois is rated Satisfactory.

Conclusions for Areas Receiving Full-Scope Reviews

Based on our full-scope reviews, the bank's performance in the State of Illinois is reasonable.

Distribution of Loans by Income Level of the Geography

We did not perform a geographic analysis of the distribution of loans at this evaluation. An analysis is not meaningful as there are no low- or moderate-income CTs in the AAs.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a reasonable distribution of loans to individuals of different income levels and businesses and farms of different sizes, given the product lines offered by the bank.

Home Mortgage Loans

Refer to Table P in the State of Illinois section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's home mortgage loan originations and purchases.

The distribution of home loans reflected reasonable penetration to individuals of different income levels.

Tazewell AA

The distribution of home loans reflected excellent penetration to individuals of different income levels in the Tazewell AA. The proportion of lending to low- and moderate-income families was comparable to the percentage of low-income families in the AA and exceeded the percentage of moderate-income families in the AA. The proportion of lending was significantly stronger than the aggregate distribution for low-income families and stronger than the aggregate distribution for moderate-income families.

Logan AA

The distribution of home loans reflected poor penetration to individuals of different income levels in the Logan AA. The proportion of lending to low- and moderate-income families was well below the percentage of low- and moderate-income families in the AA and was significantly weaker than the aggregate distribution. High rates of poverty limit opportunities for home loans to low-income households in the Logan AA. In addition, the bank's branch location is not within the same city as the geographies with the highest low-income families, which may hinder lending opportunities as well.

Small Loans to Businesses

Refer to Table R in the State of Illinois section of appendix D for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to businesses.

The distribution of business loans reflected excellent penetration to businesses of different sizes. The proportion of lending to small businesses was above the percentage of businesses in both AAs. The proportion of lending to small businesses was significantly stronger than the aggregate distribution for both AAs.

Responses to Complaints

FNBT did not receive any complaints about its performance in helping to meet the credit needs of its AAs during the evaluation period.

Appendix A: Scope of Examination

The following table identifies the time period covered in this evaluation, affiliate activities that were reviewed, and loan products considered. The table also reflects the MSAs and non-MSAs that received comprehensive examination review, designated by the term “full-scope,” and those that received a less comprehensive review, designated by the term “limited-scope”.

Appendix B: Summary of MMSA and State Ratings

RATINGS for First National Bank in Tremont	
Overall Bank:	Lending Test Rating
The First National Bank in Tremont	Satisfactory
MMSA or State:	
State of Illinois	Satisfactory

Appendix C: Definitions and Common Abbreviations

The following terms and abbreviations are used in this performance evaluation, including the CRA tables. The definitions are intended to provide the reader with a general understanding of the terms, not a strict legal definition.

Affiliate: Any company that controls, is controlled by, or is under common control with another company. A company is under common control with another company if the same company directly or indirectly controls both companies. For example, a bank subsidiary is controlled by the bank and is, therefore, an affiliate.

Aggregate Lending (Aggt.): The number of loans originated and purchased by all reporting lenders (HMDA or CRA) in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Census Tract (CT): A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Combined Statistical Area (CSA): A geographic entity consisting of two or more adjacent Core Based Statistical Areas with employment interchange measures of at least 15. An employment interchange measure is a measure of ties between two adjacent entities. The employment interchange measure is the sum of the percentage of workers living in the smaller entity who work in the larger entity and the percentage of employment in the smaller entity that is accounted for by workers who reside in the larger entity.

Community Development (CD): Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet Small Business Administration Development Company or Small Business Investment Company programs size eligibility standards or have gross annual revenues of \$1 million or less; or activities that revitalize or stabilize low- or moderate-income geographies, distressed or underserved nonmetropolitan middle-income geographies, or designated disaster areas.

Community Reinvestment Act (CRA): The statute that requires the OCC to evaluate a bank's record of meeting the credit needs of its entire community, including LMI areas, consistent with the safe and sound operation of the bank, and to take this record into account when evaluating certain corporate applications filed by the bank.

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into ‘male householder’ (a family with a male householder and no wife present) or ‘female householder’ (a family with a female householder and no husband present).

Full-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that conduct business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants, the amount of loan requested, the disposition of the application (e.g., approved, denied, and withdrawn), the lien status of the collateral, any requests for preapproval, and loans for manufactured housing.

Home Mortgage Loans: A closed-end mortgage loan or an open-end line of credit as these terms are defined under 12 CFR 1003.2, and that is not an excluded transaction under 12 CFR 1003.3(c)(1) through (c)(10) and (c)(13).

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (e.g., geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-Income Individual: Individual income that is less than 50 percent of the area median income.

Low Income Geography: A census tract with a median family income that is less than 50 percent.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Median Family Income (MFI): The median income determined by the U.S. Census Bureau every five years and used to determine the income level category of geographies. The median is the point at which half of the families have income above, and half below, a range of incomes. Also, the median income determined by the Federal Financial Institutions Examination Council (FFIEC) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above, and half below, a range of incomes.

Metropolitan Division: As defined by Office of Management and Budget, a county or group of counties within a Core Based Statistical Area that contains an urbanized population of at least 2.5 million. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area: An area, defined by the Office of Management and Budget, as a core based statistical area associated with at least one urbanized area that has a population of at least 50,000. The Metropolitan Statistical Area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rating Area: A rated area is a state or multi-state metropolitan statistical area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multi-state metropolitan statistical area, the institution will receive a rating for the multi-state metropolitan statistical area.

Small Loan(s) to Business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans.

Small Loan(s) to Farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, or are classified as loans to finance agricultural production and other loans to farmers.

Tier 1 Capital: The total of common shareholders' equity, perpetual preferred shareholders' equity with non-cumulative dividends, retained earnings and minority interests in the equity accounts of consolidated subsidiaries.

Upper-Income: Individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent, in the case of a geography.

Appendix D: Tables of Performance Data

Content of Standardized Tables

A separate set of tables is provided for each state. All multistate metropolitan statistical areas, if applicable, are presented in one set of tables. References to the “bank” include activities of any affiliates that the bank provided for consideration (refer to appendix A: Scope of the Examination). For purposes of reviewing the Lending Test tables, the following are applicable: (1) purchased are treated as originations; and (2) “aggregate” is the percentage of the aggregate number of reportable loans originated and purchased by all HMDA or CRA-reporting lenders in the MMSA/assessment area. Deposit data are compiled by the FDIC and are available as of June 30th of each year. Tables without data are not included in this PE.

The following is a listing and brief description of the tables included in each set:

Table P. Assessment Area Distribution of Home Mortgage Loans by Income Category of the Borrower - Compares the percentage distribution of the number of loans originated and purchased by the bank to low-, moderate-, middle-, and upper-income borrowers to the percentage distribution of families by income level in each MMSA/assessment area. The table also presents aggregate peer data for the years the data is available.

Table R. Assessment Area Distribution of Loans to Small Businesses by Gross Annual Revenue - Compares the percentage distribution of the number of small loans (loans less than or equal to \$1 million) originated and purchased by the bank to businesses with revenues of \$1 million or less to: 1) the percentage distribution of businesses with revenues of greater than \$1 million; and, 2) the percentage distribution of businesses for which revenues are not available. The table also presents aggregate peer small business data for the years the data is available.
